CONSULT THE WOMEN BEFORE YOU BUILD MORE HOUSES

Advice For the Peel Town Commissioners

A SCHEME is being prepared by the Peel Town Commissioners allowing for the erection of three 3-bedroomed houses on the plot of ground between Heathfield Drive and Boilley Spittal, such houses to face on to West View, and six 2-bedroomed houses, such houses to face on to Heathfield Drive. The number of houses will be subject to a survey of the ground being made by the architects Messrs Davidson, Marsh and Co.

The Housing Committee dealing with the new housing proposals, has been presided over by Tom E. Cowell and present at the last meeting were Mr W. H. Lucas and Captain Frank Callister.

At Wednesday's meeting of the Commissioners, Mr Forrest said there was a terrible shortage of houses in Peel.

The architects with the plans for these new houses have explained in detail the layout of the proposed houses, but, writes Harry Clarke, why not seek the advice of the women who live and have to do the work in these houses.

In Peel we hear about the Fenella Terrace houses and the Boilley Spittal houses and the North View houses all owned by the town.

We hear about the little faults

in this house and the good points in another house.

There will never be a perfect house, but the women who have to do the daily work in these houses should be shown these plans and the general layout before final decisions are taken.

No man would decide to build a house without very full co-operation and discussions with his wife.

Can the Peel Commissioners or any other committee of mere men take it upon themselves to finally decide the best place to put those kitchen cupboards or the most convenient place to put the kitchen sink.

Maybe the Commissioners' Housing Committee members ought to bring their wives to their next meeting when the housing plans are being discussed.
